

Don't miss the opportunity to meet our team of experts at this year's DesignCon!
The technology exhibition brings together the brightest minds across the high-speed communications and semiconductor industries who are looking to engineer the technology of tomorrow.

Join us at our [Booth 952](#) and experience a series of live demos at our partners' booths.

As part of the ever-evolving data center environment, MultiLane aims to ensure that its technology keeps pace with industry needs.

We are excited to showcase our latest test solutions that enable cost effective validation and manufacturing processes for the 400G ecosystem.

- Learn more about our PAM4 Bit Error Rate Testers
- Check out our 400G Forward Error Correction (FEC) solutions
- Find out how our TDR cable tester can ensure your network is ready for 400G
- Explore our fully automated transceiver test solution

400G 4x56 GBd PAM4 BERTs

General purpose

Crosstalk/noise

EML drive

400G 8x28 GBd PAM4 BERTs

General purpose

Manufacturing

Host/margin tester

400G BERT 4x35 GHz TDR/TDT and DSO

Cable/TIA tester

400G-DR4 Manufacturing Testing

NEW HEADQUARTERS

What a great way to start 2020! We recently moved to Houmal Technology Park in Lebanon, an integrated ecosystem specifically designed to provide an environment of growth: 10,000 m² of office space, R&D labs and manufacturing.
